

Number of Fellowships and Areas of Research

There are at least 27 fellowships available under the programme across the participating institutions. The participating institutions have identified priority areas of research for the fellowship programme that reflect their translational research strengths. The number of fellowships by institution and the area of specialisation, if any, are as follows:

National University of Ireland, Galway www.nuigalway.ie

At least six fellowships are available. Applications will be supported in the major translational biomedical research areas of the NCBES and REMEDI, including but not limited to cancer biology, regenerative medicine, neuroscience, biomedical engineering, reproductive disorders, and infection & immunity. More information on the research areas is available at the following websites:

NCBES www.ncbes.ie *REMEDI* www.remedi.ie

Royal College of Surgeons in Ireland www.rcsi.ie

Eight fellowships are available. The areas of specialisation are cancer, neuroscience, respiratory medicine, cardiovascular disease, inflammation, and endocrine disorders.

More information on the research projects is available at the following website:
<http://www.rcsi.ie/index.jsp?1nID=93&2nID=96&3nID=96&pID=128&nID=1149>

Trinity College Dublin www.tcd.ie

Four fellowships are available. The specialist areas of particular interest are cancer, immunology and infection, and neuroscience. More information is available at the following websites:

TCD School of Medicine - Research <http://www.medicine.tcd.ie/research/>

TCD Institute of Molecular Medicine <http://www.tcd.ie/IMM/>

University College Cork www.ucc.ie

Six fellowships are available. The areas of specialisation are cancer, neuroscience, and microbe-host interactions. More information is available at the following websites:

UCC Biosciences Research Institute <http://www.bsi.ucc.ie/>

Cork Cancer Research Centre <http://www.ccrcc.ie/>

Alimentary Pharmabiotic Centre <http://apc.ucc.ie>

University College Dublin www.ucd.ie

Three fellowships are available. The specialist areas of interest are infection/inflammation/immunity; diabetes and vascular biology, and neuroscience. More information is available at the following websites:

UCD School of Medicine & Medical Science - Research
