

DMMC COURSES & WORKSHOPS

MOLECULES TO MEDICINES: HOW BIOPHARMA DELIVERS Workshop

Wed 10 May 2006

Venue: UCD Conway Institute, University College Dublin ([location](#))

This DMMC/Wyeth 1-day workshop, for 24 participants, comprises discussion of key issues arising during biopharmaceutical discovery, development, and manufacturing. It will include breakout group discussion of specially devised problem sets.

Participants in this workshop will be postgraduate students selected in consultation with Principal Investigators in TCD, UCD, and RCSI. Attendance at the [lecture course](#) on the preceding day (Tue 9 May 2006) is compulsory.

WORKSHOP: Wed 10 May; 0930-1800

0930 **Introduction to the workshop: key issues in discovery, development, and manufacturing**

1020 Tea/Coffee

DISCOVERY

1040 **Issues in discovery: defining the breakout session problem set** Dr Davinder Gill

1120 **Breakout session 1: issues in discovery**

1200 **Breakout session 1 feedback**

1240 Lunch

DEVELOPMENT

1320 **Issues in development: defining the breakout session problem set** Dr Mark Leonard

1400 **Breakout session 2: issues in development**

1440 **Breakout session 2 feedback**

1520 Tea/Coffee

MANUFACTURING

1540 **Issues in manufacturing: defining the breakout session problem set** Dr Brendan Hughes

1620 **Breakout session 3: issues in manufacturing**

1700 **Breakout session 3 feedback**

1740 **Discussion: key learnings**

Course Developers/Instructors comprise key personnel from Wyeth BioPharma. Follow the links below to read short biographies.
